About me

Development has never been just "work" for me, it has been about teamwork, goal-oriented programming, and the process of learning and growing. Using technologies such as JavaScript and implementing Git in the terminal helps me learn and grow to develop high-quality programs. What started with a simple "Hello World!" has grown to a passion that only gets more delightful

Work experience

Open Source Developer - Mozilla/ Pontoon October 2020 - Present
Worked with a variety of different languages, platforms, and frameworks such as JavaScript, Python, React, Docker, Git, Github. Write in modern, maintainable code for a diverse array of frontend and backend problems. Communicate with a team of engineers weekly.

Projects

Movie DB Applicaiton | Code November 2020
A React based application that will show you current movies available to watch. It takes advantage of the Movie DataBase API and uses the data to display on the frontend as cards and on individual pages also includes a search function.

Budget Application | Code September 2020
A fundamental JavaScript application, taking advantage of ES6 functionality. You can use this budget app to keep track of your finances. Taking the income and expenses and showing the difference in a percentage.

Education

UEI; Riverside, California — Pharmacy technician, 2012

Skills

- JavaScript (ES6+)
- React.Js
- Docker
- HTML/CSS
